

Contemporary Alexander School Modules

Group Teaching / Crafting Group Games

This Module offers the basic skills for highly dynamic and experiential group teaching.

Group Teaching is an art form.

It is not the same as teaching an individual lesson that is witnessed by a group. Rather, it is multi-dimensional teaching - tracking not only each student, but the group itself, as a dynamic, conscious body.

Teachers will learn the fundamentals of group teaching; specific group activities and games which offer participants a *direct experience* the Principles of the Work; and tools for *designing your own* new group teaching material.
